Web developer with good knowledge of **JavaScript (ES6+), React, HTML, CSS,** excellent **planning** and **organization** skills, **analytical** approach and craving to learn. Experienced **project manager** with significant **achievements**. In free time, a mountain runner, AI and blockchain enthusiast.

< PROJECTS />

MyWallet: ———————————————— https://github.com/marcinsuski/mywallet

- I designed and implemented a budget management application.
- Technologies: **React, MUI, Chart.js**, useReducer (state management)

Crypto Coin Tracker: ———— https://github.com/marcinsuski/cryptocurrency-tracker

- I designed and implemented a SPA application to track changes in cryptocurrency prices.
- I used an external **API** to download current data and presentation on charts.
- Technologies: **React, MUI, Chart.js, API, Context API, Alice Carousel**

Dalle clone: ——————————— https://github.com/marcinsuski/dalle_clone

- I designed and implemented a **fullstack** application that allows you to generate images based on the entered text, share and save.
- I used an external **API** (Open AI - DALLE-2) to generate images via AI.
- Technologies: **React, Node.js, Express, MongoDB, OpenAI API, Tailwind css**

< PROFESSIONAL EXPERIENCE />

Freelance web developer / career change
sept 2022 - currently

- Creating and maintaining websites and applications using **HTML, CSS, JavaScript, React.js,** various libraries and **APIs** to meet the requirements and goals.
- Coding mock-ups to final websites, **pixel-perfect** and **RWD** using **HTML, CSS, JavaScript.**
- Diagnosing and solving bugs in the code, writing **automated tests.**

Strategic projects Manager
mar 2015 - aug 2022

Krowarzywa

- I **implemented a central sales and reporting system for a chain of 20 restaurants**, enabling quick data collection and analysis for the entire chain.
- I implemented an **internal data exchange, communication and reporting system** based on **cloud solutions** (Microsoft) for the network and for the headquarters.
- I **developed the delivery channel** for the chain, securing contracts with **20% better than market conditions** with the largest delivery market players even before the outbreak of the pandemic (delivery boom).
- In the first days of the **COVID lock-down**, I ensured the **uninterrupted operation** of all restaurants in the chain in accordance with the restrictions.
- I developed **documentation of procedures** for the restaurant network (300+ pages).
- I developed **periodic reports**, **accurate predictions and strategies**, guaranteeing the constant development of the network.
